

## Cheese

Some people go potty for partridge,  
and some get the 'grots' without grouse  
But there's one type of food that puts me in a good mood  
That's a nice piece of cheese in the house.

Kangaroo meat they say's good to eat,  
And some think that steak is o great  
But there's only one dish that I ever wish is something with cheese on my plate.

There's curry and rice, which I'm sure is quite nice  
And seafood, or even Chinese  
But one thing I like be it morning or night  
Is a really nice piece of cheese.
